SUMMARY:

I am a high-energy, confident individual with an infectious enthusiasm for technology. I am an experienced software developer with expertise in front end application development. I am also fluent in current UI/UX design standards.

TECHNICAL SKILLS:

JavaScript, Java, jQuery, Ember, AngularJS, QUnit, Puppeteer, Ajax, RESTful API, HTML5, CSS3, SASS, Twitter Bootstrap, Foundation, NPM, Grunt, Bower, Apache Tomcat, Spring Framework, Hibernate, Maven, SQL, MySQL, PostgreSQL, Eclipse, Atom, Git

PROFESSIONAL EXPERIENCE:

Rendia

Front End Developer

May 2017 – Present

Baltimore, MD

- Engineered and launched multiple Ember.js applications used by doctors to educate patients on lens replacement options.
- Implemented analytics tools and built company facing dashboards to visualize KPIs.
- Continued to support suite of enterprise scale video applications used to educate thousands of patients nationwide. Applications leverage Ember.js and HTML5 video.

Junior Front End Developer

October 2016 – May 2017

- Supported existing Ember.js enterprise video applications through refactoring existing code and implementing bug fixes.
- Translated mockups from design teams into new application features.
- Leveraged existing RESTful API to implement user editable tagging system for video platform.
- Implemented redesigned HTML email templates.
- Supported existing Google Analytics integrations.

Catalyst DevWorks

Developer

August 2015 – July 2016

Baltimore, MD

- Completed 20 week intensive training program where skills in full stack development were gained resulting in work on company projects.
- Worked to develop an AngularJS application used to track and analyze company training programs. Application used Java for API calls to a SQL database, as well as HTML, CSS, and Angular Material on the front end to meet current Google Material design standards.
- Contributed software engineering expertise in the development of scalable enterprise applications through the software lifecycle, from requirements definition through successful deployment.
- Utilized Agile methodologies to collaborate with team and meet needs of product owner while meeting biweekly deadlines for new features.
- Led team in application UI/UX redesign to implement current web design standards as well as Google Material design standards.

Monumental Sports and Entertainment*Basketball Operations Assistant*

October 2010 - Present

Washington, DC

- Team liaison to meet any game day needs for NBA officials
- Assure courtside equipment is ready for use on game days
- Assist team with Draft workouts, Summer League camp and Training Camp in offseason
- Train and supervise newly acquired Team Attendants to ensure all game day duties are fulfilled
- Maintain and organize locker room and equipment room
- Receive and process new shipments of equipment

EDUCATION:**The Community College of Baltimore County**

January 2013 – December 2014

January 2019 – Present

Completed 55 credits toward an Associate degree in General Studies

Catonsville, MD
